GTS Educational Events Launches New Golden GOVIT Awards Program in Concert with the 36th Annual Government IT Symposium

Winners will be celebrated at a special awards ceremony on December 5 at the Science Museum of Minnesota

Saint Paul, Minnesota – GTS Educational Events is thrilled to announce the new Golden GOVIT Awards program, in recognition of individuals, government agencies, and other public sector institutions that have advanced government technology through collaboration, innovation and service.

Golden GOVIT award winners are reviewed and selected through a peer-voting process in each of the following categories: Collaboration, Innovation, Service, and Individual Leader. Winners will be announced and celebrated at the opening reception for the 36th annual Government IT Symposium on December 5 from 4:30-7 p.m. at the Science Museum of Minnesota in Saint Paul. The reception is free and open to the public, though pre-registration is encouraged by visiting www.mngts.org/itsym/govit.

In addition, award winners will showcase their projects or programs during the three-day Symposium.

“Through the new Golden GOVIT Awards program, we want to celebrate those individuals and projects in government IT that go above and beyond to serve the public,” said Mary Wynne, executive director, GTS Educational Events. “The Government IT Symposium provides a natural forum to feature the products, services, systems and solutions that improve government IT services and benefit citizens.”

The Government IT Symposium is the Midwest’s largest government IT event, bringing together nearly 1,000 IT government leaders and professionals from around the region to collaborate and focus on using IT innovations, integration and intelligence to support the public good.

In addition to celebrating the Golden GOVIT Award winners, this year’s Symposium will feature Garry Golden, an academically trained Futurist who speaks and consults on issues shaping business and society in the 21st century.

Symposium attendees will also have the opportunity to view demonstrations and discuss cutting-edge products and initiatives; access the latest research, models and insights from content experts from the public, civic and private sectors; and network with exhibitors and colleagues from across all sectors of government.

The 2017 Government IT Symposium takes place December 5-7 at the Saint Paul RiverCentre. Registration is available by visiting www.mngts.org/ITSym.
